

NEVE.

1659.

2
A New Almanack and Prognostication, serving for the yeare of our Lord God and Saviour Jesus Christ, 1659.

Being the third yeare after the Bissextile or Leap-year.

Wherein is contained a double Kalender viz. the Julian or English Accompt, and the Gregorian and Forraigne Computation, with the Change of the Moone, her Full and Quarters, and time of the Eclipses: and other necessary observations, convenient to be used.

Calculated, and exactly rectified, for the Elevation of the Pole Articke, and Meridian of the ancient and famous City of *Norwich*, and may serve generally for the most part of great BRITAIN.

Printed, penned, and published, by JOHN NEVE, Gent.

Annually continued by the Author, and the fifty ninth time Imprinted

LONDON.

Printed by S. I. for the Company of STATIONERS.

The Contents of this double Kalender for this y^ear
of our Lord God 1659. being the third af-
ter the Bisextile or Leap-yeare, according
to the Accompt and Computation
of the Church of ENGLAND.

The Prime or Golden Number.

The Circle of the Sun.

The Epact.

The Roman Indiction.

NEVE. 1659.

A PROGNOSTICATION,
Serving for the yeare of our
Lord God and Saviour
JESVS CHRIST
1659.

Wherein you may observe the
grounds of the alteration and conditi-
on of the Foure Quarters of this yeare: As
also the disposition of the Aire, for each se-
verall Moneth, according to the inclinati-
on of the Coelestiall bodies, with the change of the
Moone, her fall, and Quarter, and the time
of the Eclipses, with other things fit to
be known and observed.

Calculated, and especially referred to
the Longitude and Elevation of the
Pole Artick, of the ancient and famous City
of *Norwich*, and may serve generally
for all ENGLAND.

Collected, composed and pub-
lished by *John Neve Gent.*

The 59. Edition by the Author.

Printed at London by *W. Wilson* for the
Company of Stationers. 1659:

NEVE. 1659.

of all the Eclipses which shall
happen this present yeare of
our Lord God 1659.

Our Eclipses of the Lunaries may this yeare be
apparently seen, whereof two of the Moone and
of the Sun shall be presented unto us in this our
izon of England, if the weather be faire & cleare :
the other Eclipse of the Sun shall be manifested
to people in severall Countries farre distant from
D. which shall after be noted.

Of the first Eclipse of the Moone.
On the 26. of Aprill being Tuesday, according to
our English computation, shall sensibly or visibly
unto us a particle Eclipse of the Moone, a-
8. of the clock : the beginning will be between
7. of the clock at night, and the end will be
between 9. and 10. of the clock : the time of this E-
clipse from the beginning to the midst thereof, will
be 1. houre and 37. min. The whole continuance of the
Eclipse from the beginning to the ending therof,
will be 3. houres and 14. min. The degrees eclipsed
will be 8. and 29. minutes.

Of the second Eclipse of the Moone.
There shall be presented unto our sight, another
great particle Eclipse of the Moone, in our Hor-
izon upon the 10. of October, about 3. of the clock in
the morning, the Moon being at that instant, dia-
metrically opposite to the Sun, neere Cauda Draconis-
igne of the Earthly Triplicity, cold and dry, fe-
uerine, fixed, the house of Venus, and her
and the detriment of Mars. The degrees Eclip-
se 8.29. min. The time of incidency, will be one
37. min. The totall duration of this obscurity,
will be 3. houres and 14. minutes.

The

A Prognostication.

The third Eclipse of the Sun.

Upon the 4th of November being Friday, acc
to to our Julian or English yeare, shall ha
great particle Eclipse of the Sunne, about h
oure after three of the clock in the afternoon
Sun and Moon being both of them coniuncte
second face of Scorpio, not far from Caput
nis, in a signe of the watery Triplicity, and
cold and moist, of complexion flegmatick, the
eclipsed are 7. 32. min. the time of incidency is
one hour, the beginning of the Eclipse, is in
1 and 2 of the clock, and the middle between
and at the Sunnes setting her is still eclip
light.

Of the fourth Eclipse of the Sun.

This fourth Eclipse of the Sun being in
our Horizon, is omitted and not taken in
place happening the 11 day of May, being be
neare 4 of the clock in the morning. This
eclipse is remoued from our Meridian about
houres in Longitude of 335 deg. and 55 min.
the 21 degrees of south Latitude which
the people in Brasilia, and es the Inhabitants
occidentall parts of Mexicana, the whole
time of this obsury from the beginning to the
be 4 hours and 13 min.

The great coniunctions of great Starrs.

The Eclipse of Sun and Moon :
Doth threat great death, great Dearth and
If we repent not soon.

Now God above, and wrath above,
And Heaven above relent :
And man beneath, and sin beneath,
And earth beneath Repent.

Some briefe Rules for Husbandry and Gardening.

The best time to sow all kind of corne, is when the Moon is in Cancer.

The best time to plant and graft, is in the increase of the Moon, the being in Taurus, Virgo, or Capricornus.

Remove and set young trees from October till February, in the first quarter of the Moon, shee being in Taurus or Capricornus.

Crop trees and fell wood, that the stock may the better and sooner grow again, when the Moon is in the first quarter.

Fell timber in December and January, in the old of the Moon is best: but if you would have it grow a better, cut it down in the new of the Moon.

The best time to cut Wines, is in the end of January, in February, and in the beginning of March, the Moon increasing in Taurus, Virgo or Capricornus.

Cut hedges between the change and full, from the end of January, till the beginning of June.

Set and sow all kind of seeds, the moon being in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: But the seeds whose roots be round, must be sowne three or four daies before or after the full moon.

Gather all manner of fruits, near the full Moon, a dry time, gather flowers, and seeds for sowing, at the full of the Moon.

Geld cattell, the Moon being in Aries, Sagittarius, Capricornus: Sheare sheep, cut hair that it may the better grow again: the Moon increasing, that is from the change to the full.

To muck your land that weeds may not abound, best in the last quarter of the Moon.

A fit time to kill fat swine is in the increase, nigh

A Prognostication
the full of the Moon, the lard will the better in
the boylng.

Destroy wens, warts, and Cornes &c. in
quarter of the Moon.

Brief Rules and necessary Observations concerning Bleeding
Bathing, Purging, and sweating, according to the motions of
the Moon.

Of bleeding.

When the weather is extream hot or cold, not then convenient either to let him purge, unlesse some great necessity require it: notwithstanding if this blood-letting be for the Phœnix, the Apoplexie, for a continuall headache, ceeding of Choler or blood, or any hot burning or other extream pain, a man in such a cause, may stay for a chosen time, because the patient might carry in the mean season, but in this aforesaid extreemity, blood is not to be let in such a quantity as otherwise it would, if a chosen time might conveniently expected.

The best time to let the Phlegmatick blood, when the moon is in Aries, or Sagittarius, the highest excepted.

For melancholy, the moon being in Libra, or Aquarius, the huncrocks and leggs excepted.

For the Cholerick, the moon being in Cancer, or Pisces, the breast and feet excepted.

For the Sanguine, all be good which before is med.

In the spring time let blood at the right side.

In Harvest time, let blood on the left side.

NEVE 1659.

Of Bathing.

Bathing are commonly used rather for pleasure then for profit, especially where hot houses are overmuch banished, but I intend not to speak of them other wise then to advertise those that tender their own health, to be wary and circumspect in resorting unto them, without cause, and immediately after or with such persons, as be unclean.

Know it is not good to Bath, the moon being in earthly signes, as in Taurus, Virgo, or Capricornus, the reason is, because they are of a cold nature; and the nature of cold, is to restrain and bind: and so the Moon being in these signes, the pores of the body are closed and shut: So there can be no resolution of humours and superfluities, which by bathing ought to be avoided.

But in fiery signes, when the moon is in Aries, Leo, or Sagittarius, then it is a good time for bathing, for then the body is apt to resolution: for it is the nature of heat, to open and resolve.

It is best bathing two or three daies after the change, and at the full of the moon, for then the impurities are ripe and ready to be avoided, and disposed to flow and issue out, which indeed is the true use of bathing.

If any will enter the Bath for cleanness sake, let the moon be in Libra or Pisces.

Furthermore if bathing be used for health, let the party grieved learne of the wise Physician, whether his sickness had need of moistening or drying; for if it require moistening, as in Phthisis, and such like, then let him bath in watry signes, having good aspect with Jupiter or Venus, But if the sickness require drying, as in Paralysis, and the like, then let him bath, the Moon being in fiery signes, having good aspects with Mars and the Sun.

Also before you enter into any bath, your body must be first prepared and purged, for if you go in unprepared, peradventure you may be worse than before.

The best time of the year to bath is in the Spring, and in Harvest, & in the months of May and September.

The

A Prognostication.

The best time of the day to go into the bath is, hour after the sun-rising at the least, alwaies provided that you walk either an hour, or half an hour deince, and have a stool either by nature or art: you muste wash your head well, so long as you be in the bath, and ware you drinke not cold drinke, although you be in thursty, but forbeare all things that be cold, lest when you are hot wiedin, cold strike suddenly into the principall member and hurt you.

The time of tarrying in the bath is commonly an hour, but it may be more or lesse, according to the nature of the bath, or sickness of the party, at the direction of the wise Phylistian.

For purging.

In purging these five things ought to be known.

1 } The humour which abounds.
2 } The best way to avoid it.
3 } The strength of the person.
4 } The manner of the sickness.
5 } The force & nature of the medicine.

For when these things are not considered and obserued, many perillous accidents may follow, and greatly hurt the body.

Good signes generally for purging, are Cancer, Scropio, and Pisces, particularly with potions or drunks, the Moon being in Scropio.

Purge with Electuaries, the Moon being in Cancer, purge with Pills the moon being in Pisces.

Take preparatives, the moon being in Gemini, Libra, or Aquarius.

Take vomits, the moon being in Aries, Cancer, or Capricornus.

Take Glisters, the moon being in Libra or Scropio.

To provoke Meelings, the moon being in Cancer, Leo, or Libra.

To stop Fluxes, Rheumes, and Laxes, the moon being in Taurus, Virgo, or Capricornus.

Good to comfort the vertus Attractive, the moon being in Aries, Leo, or Sagittarius.

Good to comfort the vertue Digestive: the moon being in Gemini, Libra, or Aquarius.

Good

Good to comfort the vertue retentive, the moon being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Expulsive, the moon being in Cancer, Scorpio, or Pisces.

For using of Anguents, or plasters, they are best to be applied and used, when the moon is in that member or signe which governeth that part of the body, to which it is applicable.

For sweatings.

Sweatings as they are of two sorts, that is to say, naturall and artificiall, so they are used for two ends and purposes: the Naturall sweat, if good heed be taken in opening of the pores, will dissolve grosse and thick humours, will cleanse the blood, will comfort the spirits, will put away cold, will consume raw humours, qualifie and quench raging fevers, will help minnesse, and the dyopslie.

The Artificiall sweat will cleanse scabs, put away itch, amend dulnesse in hearing, ease the stone, resolve congealed and cold humours, and melancholly blood.

But for the better performing and effectuall working of these causes, the Counsell of the learned Physician is to be desired and used.

The best or meetest signes to sweat in, are Aries, Leo, and Sagittarius, and that two or three daies after the Change, and at the full moon.

And note that sweating is better to be done, in the evening then in the morning: for when the body hath nourishment within, the spirits shall not so easily be drawn forth to the extream parts.

Note further, that lean folks, and dy or feeble persons, will sweat little, for it will hurt them much: but fat folks, may sweat well, and it will do them much good.

A Prognostication.

A brief Description of the four Quarters of this present year of our Lord God. 1659.

Of Winter.

WINTER which is the chiefeſt ſor to the ſpring, (the disgrace of SUMMER, and the deep devourer of the fruitfull harveſt) began to take his effects, according to our uſuall computation, on the 11. of Decem‐ber in the year aforē going, at the entrance of the Sun, into the firſt minute of the ſigne Capricorn, at which time the Sun ſhall be at his greateſt South declination, from the Equinoctiall line, ſo that he reſeth South-Eaſt, and ſetteth South-West.

Now is the Hyenal or Winter Solſtice, for the Sun is ſo far removed from our Zenith or verticall point, that he cannot decline any further, & standeth at a ſtop or stay, and then is the ſhortest day and longeſt night in the year, and ſo this Quarter doth continue until the 10 of March next following.

This ſeafon is by nature cold and moist, unpleaſant for the moſt part to travellers either by ſea or Land, and unto aged perſons it is very combustious and noyſome, cauſing ſuperfluitie of rawneſſe, and abundance of cold moistneſſe to oþer flow their bodieſ, to their great troubles and diſquietneſſe.

The diſeafeſ and ſickneſſeſ, moſt like to affiſt menſ bodieſ this quarter, will be Rhumes, Coughs, Poſes, quotidian Fevers, Gouts, Palfies, Flu, Cramps, Convulſions Epilipsies, Appoplexes, Collicks, raw undiſteſted Humours, Hoareſenelle and many cold Diſtillationeſ, into ſeveral parts of the body.

Thus will the ſtarreſ if God aſſent,
Whose power alone can all prevent.

Of

NEVE. 1659.

Of the Spring.

The Sun (which is the eye of the world, the fountain of light, and the chiefe moderator of all the rest of the lights) hath like a Gyant run his race, and finished his revolution (Gradatim) throughout the 12 signes, and now this 10 of March beginneth his journey afresh again, and goeth an even course, and so becomes an indifferent Arbitre, betwix the day and night, and maketh an Equality throughout his whole government, to the great joy and comfort of all his revived Subjects, chearing with his splendent countenance, the poor weather-worn weedz of this our dark starr of mortallity (which the darkned Countenance of winters extremity, had almost subdued) with his excellent presence, whereat the earth begins to smile, and to put on her new apparell, the flourishing Livery of fresh Flora.

This season is by nature hot & moist, the most temperate time of the year, and the least breeder of sickness that doth procure death; and a very convenient time for the removing of sickness and griezes gotten before, and also to avoid and prevent those that are to come: for now the dul senses and spirits of man and other creatures are quickned and revived, and therefore the humours which do abound, and are readiest to oppres nature, are fit to be emptied and avoided whether by blood-letting, purging, or otherwise, as the learned Physician shall advise, and as the cause of the disease shall require: such therefore as be diseased, let them not neglect this time.

Sundry sorts of Sickneses, and infirmitie are subiect to this quarter, as Tertians, and unconstant fevers, obstructions in severall parts, Jaundies, Swellings, hot Impostumes, Squinnancies, bleeding at the Nose, with Pusches, Boyles, small Pox, Tetteres paine in the head and eyes, Mesels, Kings-evill, Pe-silent fevers, and many other diseases whch may proceed of the corruption of the bloud.

Infections from the starrs may fall,
But one above doth stay them all.

Of

A Prognostication.

Of Summer.

Summer the third part of our vulgar year, according to our usuall computation: Now when the Sun hath fully determined the Spring, with his last Graze of Gemini, and moved in his motion, to the hight point of his course, namely to the first entrance of Cancer, whiche shall be this year the 11. of Iune. This is the second solstice of the year, called the festivall Summer solstice: for even as the Sun, when he hath reached Capricornus, hath his greatest South declination from the Equinoctiall: So now at his ingress to the beginning of Cancer, he hath his greatest declination toward the North from the said Equinoctiall line: and even as at that time of the winter Solstice, he is so far removed from our verticall point, that he can move no further towards the South, and was therefore to approach again towards our North latitude, at which time he seemeth to stand: So now being come so near to our Zenith that he cannot remoue no further towards the North, and is therefore to revert again to the South Latitude. At the first issuing from us he seemeth also to stand, insomuch that even as before at his return toward us again, he maketh with us the shottest day and longest night in the year: So now at his return from us, he maketh with us contrariwise, the longest day and shortest night in the year: afterwards declineth more and more from us, like as before he moved more and more towards us.

This season according to his proper nature, is hot and dry turning the humours of mens bodies, into hotnes and drynes, resembling the element of fire, and complexion of Tholer, bringing all fruits to their ripenesse, cattle to their fatnesse, and men to the wealth.

The infirmities likely to molest and trouble us this quarter are according to the judgements of Hippocrates and other learned writers of Physicke, are burning Fevers, Phrenzies, Inflammations, Phle-

illnes, impostumes of the lungs, Sharpnesse of Urine
strangury, Ulceration of the blood, spotted Fevers,
violent Fevers, heat of bloud, and choller.

Though Starrs incline to work us ill,
All shall be as the Maker will.

Of Autumne.

Autumne, according to our accustomed computation, the last quarter of the year beginneth at the Suns departure, from the last scruple of Virgo, into the first entrance of the second Equinoctiall signe Libra, the which will be this year, on the 13. day of September, the day and night being of an equal length, as in the spring: at which time is the Autumnall Equinoctiall, for even at the Suns entrance into Aries, the day increasing from the Winter Solstice, till then come to be equall with the night, going on still more and more till the Summer Solstice, when was the longest day and shoritest night: So now the night by increasing from the Equivall Solstice, to the Sunnes ingressiuncle into Libra, hath get to be equall with the day, and shall increase more and more, till the Brumall Solstice come againe, when the night is longest, and the day shoritest.

This time of the yeare is of it selfe unconstant, and variable, warme in the day time, and cold in the night. This quarter because of the inequality of temperatur, may as Hippocrates saith, be called the mother of most of deadly sicknesses.

And also Galen saith, that this time of the yeare, is very dangerous for taking sicknesses.

The bodily sicknesses and diseases, commonly attending this time of the yeare, are many as the Stone, Stones in the Back and Reines with slopping, and impressing of Urine, much Joynt aches, Sciaticnes, Pleuris, Goutz, Many quartain Fevers, vertigoes, Apoplexies, Palsies, Lethargies, Convulsions, Crampes, &c.

A Prognostication.

Hemoroids, Fistulaes, tenesimus, dysenteria, and such diseases, Melancholly destruction, and Madness, Melancholly and obstruction of the Spleen, and such diseases as may proceed of grosse phlegme, and Melancholly.

Thus every Planet in his kinde,
Is to perforne the Almights mind.

A Declaration of the inclination, and disposition of the Winds and weather, according to the severall motions, configuration, and influences of the erraticall and fixed stars, with the day, houre and minute of the change of the Moone, her full, and quarters: And so the rising and setting of the Sunne in the seventh day of every moneth of this present yere of our Lord God 1659.

Of Ianuary.

Day. The sun riseth. The sun setteth.
1. houre. 8. and 3. min. houre 3. and 57. min
7. houre. 7. and 56. min. houre 4. and 4. min
14. houre. 7. and 46. min. houre 4. and 14. min
21. houre. 7. and 34. min. houre 4. and 26. min
28. houre. 7. and 23. min. houre 4. and 37. min.

Last quarter the 16 day 34. min. after 5. of the clock in the morning, stormy winerly weather.

New Moon the 12. day 14. min. after 8. of the clock at night, windy and unconstant.

First quarter the 20 day. 50 min. after 5. of the clock in the morning, inclined to snow or raine.

Full moone the 28. day about 9. of the clock in the forenoon, fitting the time of the yere.

Ianuaries Abstract.

In this moneth let not blood, neither use hotte physick, except great necessity constraines thee, beware of taking cold, for this moneth Rheumaticke Flegme, doth much increase: to fast long is hurtfull but to drinke white wine fasting is good and will

NEVE. 159.

me, use meates that are naturally hot moderately, and
bare warme cloathes.

In worldly busyness, this moneth you may set all kind
of common fruits trees, plants, as peares, plums, sil-
bert, walnut, and such like, hawthorne, and all sorts of
quickelets, or plants, are fittest to be generally sett,
from the change to the first quarter.

Take away mosse and superfluous branches from
your trees, and this moneth is good to sett beans,
peale, parsnips, leeks, radish, garlike, turnips, and ony-
ons, if the weather prove mild, and the moone past the
full, you may begin to graft at the end of this moneth, so
as the moone be increasing in her light.

Good husbands also this moneth crop trees, fell timber,
and geld cattell, such as are to be gelded, the state of the
moone alwaies considered.

Of February.

Day. *The sun riseth.* *The sun setteth.*

6.	houre 7. and 13. min.	houre 4. and 47. min.
7.	houre 7. and 4. min.	houre 4. and 56. min.
8.	houre 6. and 50. min.	houre 5. and 10. min.
9.	houre 6. and 34. min.	houre 5. and 26. min.
10.	houre 6. and 22. min.	houre 5. and 38. min.

Last quarter the 4. day 30. min. after 1. of the clock in the
afternoon, some fall of raine.

New moone the 11 day 13. min. after 9. of the clock in the
morning, raine and unconstant.

First quarter the 19. day 6. min. after 3. of the clock in the
morning, frosty and seasonable.

Full Moone the 16. day 7. min. after 11. of the clock at night,
cold and cloudy.

Februaries Abstract.

[¶] this moneth all slimy fish, Wilke and R̄ce, and such
fish that doe oppilate and stop the Liver and vaines, or
thicker the blood, are to be eschewed as enemies to health,
and also yet to bearre Physe, and letting of blood, except
necessitely do urge, and learned Counsell do advise you:
wherefore now of taking Cold, for now are Agues apt to be
taken, and it is very ill to take heates and afterwards
sudden cold upon them.

Now is the most apt time to graft or plant, and to set
all kind of trees and bushes, the wind and weather, & age of
the tree considered, Pease, Beans, Hastings, Onions,

C

Parsenips

A Prognostication.

Parasips, and such like, as in January, may very
be set in the wane of the Moon.

The time is now to trim up Gardens, to set and sown
kind of Kitchen Aearbs, to set slips, sow kernels, winter
seeds, oat's, set hops, cut vines, and proun them, with
your Roundball Pease and Hastings.

Of March.

Day.	Sun riseth.	Sun setteth.
1.	houre 6. and 20. min.	houre 5. and 40. min.
7.	houre 6. and 8. min.	houre 5. and 52. min.
14.	houre 5. and 54. min.	hours 6. and 56. min.
21.	houre 5. and 16. min.	houre 6. and 44. min.
28.	houre 5. and 22. min.	houre 6. and 38. min.

Last quarter the 5. day about 9 of the clock at night, rea-
nable good weather.

New Moone the 12 day 22. min. after 10. of the clock
night, inclined to moysture.

First quarter the 20 day 21. min. after 11. of the clock
night, some showers of taine.

Full moone the 28. day 36. min. after 10. of the clock
forenoon, some storne to be expected.

Marches Abstract.

In this Moneth the humours of Mans body begin
to encrease, and now gross feeding breedeth gross
and gross humours, and therefore use meates of good
fision, & such as breed good juice: it is a good time to pur-
ify and clarifie the bloud by potsons, bathing, and bloodlet-
ting; such other waies as the learned Physician shall appre-
hend, and as the cause of the disease shall require: Also
moneth sweetmeats and drincks are commendable.

The time of grafting as yet endureth, together with
tilling, sowing, prouyning, plasying of Vines, and haw-
willow, oates, pease, onions, parsnips, and such like.

Of Aprill.

Day.	The sun riseth.	The sun setteth.
1.	houre 5. and 18 min.	houre 6. and 42. min.
7.	houre 5. and 6. min.	houre 6. and 54. min.
14.	houre 4. and 54. min.	houre 7. and 6. min.
21.	houre 4. and 39. min.	houre 7. and 21. min.
28.	houre 4. and 29. min.	houre 7. and 31. min.

NEVE. 1659.

Last quarter the 4. day 46. min. after 3. of the clock in the morning, windy and cloudy.

New moone the 11. day 35. min. after high noone, ffe my and unconstant.

First quarter the 19. day, 45. min. after 4. of the clocke in afternoone, temperate.

Full Moon the 26. day neere about 8. of the clock at night, April showers.

Aprils Abstract.

In this moneth of April. the pores of mans body are open, and apt to receive Physick. and they that refuse the same, I committ them to the benefit of nature, for of all times of the yeare, this is the best time to prevent causes of sickness, or for speedy remedy in extremities, for now nature doth renew strength through all the body: so where sickness laymeth she soone unburdeneth by means of Physick, wherefore what it cannot doe now, will hardly be done hereafter, therefore take time while time is, &c.

As yet you may graft and proune vines, and also set melons, citrons, cowcumberes, artichoakes, and pale-boyes, howbarly, Tanners apply themselves to barking of trees.

Of May.

Day. *The sunn riseth.* *The sun setteth.*

1.	houre 4. and 23. min.	houre 7. and 37. min.
7.	houre 4. and 15. min.	houre 7. and 45. min.
14.	houre 4. and 5. min.	houre 7. and 55. min.
21.	houre 3. and 56. min.	houre 8. and 4. min.
28.	houre 3. and 50. min.	houre 8. and 10. min.

Last quarter the 3 day, 49. min. after 10 of the clock in forenoon, faire weather.

New moone the 11. day, 45. min. after 3. of the clock in the morning, fitting the season.

First quarter the 19 day 47. min. after 6. of the clocke in the morning, inclined to wind.

Full Moone the 26. day, 34 min. after 3. of the clocke in the morning, seasonable and temperate.

Mayes Abstract.

In this moneth rise early, for May doth not love any flig-
gery, and let such as bee in health and able walke into
the fields, and eate and drinke betimes for it is good and
holosome, adstainge from all meates that be of a hot nature:

A Prognostication.

End such as be sick, it is a very good time of the yeare to drawe
blood, or to take Physick: such as bee whole, God keepe
them in health, and such as bee sick, God send them grace
Physicians and Physick.

The time is now fitting to sow Bazill, Marjerom, &c.
such fine seedes as before might not be sowne, because of
coldnesse of the weather. Set Sage according to the
verbe, set sage in May and it will last alway, sow flax,
hemp, set Artichokes, weed your Hops, and Gardens
to your grates that no superfluous branches trouble them.
May vew, Rosemary flowers, and beane flowers, may
your pleasure be distilled this moneth, and now also ha
carr of watching your bees.

Of June.

Day. The sun riseth. The sun setteth.

1.	hour 3. and 49 min.	hour 8. and 11. min.
7.	hour 3. and 46 min.	hour 8. and 14. min.
14.	hour 3. and 47 min.	hour 8. and 13. min.
21.	hour 3. and 49 min.	hour 8. and 11. min.
28.	hour 3. and 52 min.	hour 8. and 8. min.

Last quarter the 1 day, 25. min. after 7. of the clock
night, overcasting clouds for raine.

New moneth the 9. day 18. min. after 7. of the clock at night
fitting the season.

First quarter the 17 day, 49. min. after 5. of the clock in
afternoone, hot and faire.

Full Moone the 24. day, 26. min. after 10. of the clock
in the solemnoon, windy and unconstant.

lunes Abstract.

At this moneth, if thou must needs use Physick, take
early in the morning, that it may have wrought before
the heat of the day, and use a light and thin dyet, for
Stomach is not able to digest as in winter, or in some
former moneths, and it is very good and convenient
some to drinke clarified whey, boyled with cold herbes,
to abstatne from violent exercise.

Distilling of roses, making of syrups and conserves,
now in prime, now gather such herbs as you meant
keepe all the yeare, but be sure you dry them in the heat
Good husbands and huswives are now weeding their
gardens, & others shearreing their shepe, the time com
to set rosemary, & gillyflowers, take heed of cutting her
be

the trees or herbs with knife, but rather gather them with your fingers, now you may set saffron, carry out compost, or make hay, rid gardens of snayles, ants, or planteers, &c.

Of July.

The sun riseth.

The sun setteth.

hour 3. and 54. min.	hour 8. and 6. min.
hour 3. and 59. min.	hour 8. and 1. min.
hour 4. and 7. min.	hour 8. and 53. min.
hour 4. and 20. min.	hour 7. and 40. min.
hour 4. and 30. min.	hour 7. and 30. min.

Last quarter the 1. day 44. min. after 6. of the clock in the morning, suitable to the season.

New moon the 9. day 20. min. after 10. of the clock in the morning, it clined to moysture.

First quarter the 17. day, 27. min. after 2. of the clock in the morning, sulterey and hot.

Full moone the 23. day. 24. min. after 5. of the clock in the afternoone, faire and hot.

Last quarter the 30. day about 9. of the clock at night, answerable to the season.

Julies Abstract.

At this moneth use cold hearbs & meates, abstaine from ylyck, and note the rvers are more wholsome then the mts, let the sun be up before you walke abroad, in the time of any pestilence or plague, keepe your chamber windowes without opening them when the sun bath force of shyning, and sure to perfume your chambers every morning with the upon a chafingdish of coales, then whiche nothing is better, and use Cardus Benedictus, boyled and drunke fasting, say herbest now calles Hack husbands to worke, and such as have leasure, it is good to fallow for wheat, & to carry out yle, & to gather seedes & flowers to keepe all the yeaer, and dry them in the shade, till they be almost dry, and then set them a while in the sun, & in like manner you may use your hearbs.

Of August.

The sun riseth.

The sun setteth.

hour 4. and 36. min.	hour 7. and 24. min.
hour 4. and 48. min.	hour 7. and 12. min.
hour 5. and 0. min.	hour 7. and 0. min.
hour 5. and 16. min.	hour 6. and 44. min.
hour 5. and 27. min.	hour 6. and 33. min.

New Moone the 8. day 13. min. before 1. clock in the morn, faire and windy.

A Prognostication.

First quarter the 15. day, 35. min. after 9. of the clock in the forenoon, apt for the season.

Full moone the 22. day, 7. min after 2. of the clock in the morning, inclined to moistne.

Last quarter the 29. day, 10. min. after 3. of the clock in the afternoon, faire weather.

Augustis Abstract.

In August, moderate dyet is good Physick, for it is dangerous to surfe, and take heede of heates and of colds, for nothing sooner engendereth Purples, and not to sleep much, especially in the afternoon, for no appliations and for avoiding of Agues and head-aches, and now let a man abstaine from physick especially doe compell,

Now Lady Ceres lookes to have men enough to her, they that would have good seedes for their garden next yeare, must now gather of their owne, least in they lose their labour and their money, and such as to have lettice, or other hearbs for winter, may sowe in the increase of the moone.

Of September.

Day.	The sun riseth.	The sun setteth.
1.	hour 5. and 34. min.	hour 6. and 26. min.
7.	hour 5. and 46. min.	hour 6. and 14. min.
14.	hour 6. and 2. min.	hour 5. and 58. min.
21.	hour 6. and 14. min.	hour 5. and 46. min.
28.	hour 6. and 28. min.	hours 5. and 32. min.

New Moone the 6. day about 2. of the clock in the moone, cloudy weather.

First quarter the 13. day, 53. after 3. of the clock in the noone, answerable to the time.

Full moone the 20. day 53 min. after high noone, answerable tempe are.

Last quarter the 28. day 15. minuts after 9. of the clock in the forenoon, some fall of moistne.

Septembris Abstract.

In this moneth such as have need, may safely take bath and bleed, in this moneth all things in their proper nature and vertue, and such fruits as are not infected, are good to eate for such as have gromacks: Time is good to make conserve of Barbary Quinces, winter hearbs may now be sowne, likewise time to set Artichokes, Rose trees, Apple trees, and

NEVE: 1659.

strawberries, violets gilliflowers; Apples are to bee gathered in the full of the moone, sow Marsonips, and in dy-
er gather your Hops; Good husbandry is sowynge
and weate, good huswifery is making of Urjuce,
and plucking of Hempe.

Of October:

hour 7. and 26. min.

The sun setteth:

hour 5. and 26. min.
hour 5. and 14. min.
hour 5. and 0. min.
hour 4. and 45. min.
hour 4. and 34. min.

New Moone the 6. day about 4. of the clock in the mor-
ning, apt for the season.

First quarter the 12. day, 20. min. after 10. of the clock at
night, windy and stormy.

Full moone the 20. day, about 3. of the clocke in the mor-
ning, cold and cloudy.

Last quarter the 27. day about 11. of the clock at night,
diseased to moysture.

Octobers Abstract

This moneth thou mayest take Physicke and also bath
occasion serue, use hot meates and drinckes, and use good
welosome wines to nourish good blood, and beware of ta-
king cold, because the quartaine Ague will be apt to bee
seen, and such other dangerous and ill diseases.

Remove young trees, as Apples, pears, plumbs, quynces,
set pease, parsnips, &c. good husbands neede not be
afraid to sowynge of wheat, set nuts, acorns, and filberts.
lock in holding of such good husbandry.

Of November.

The sun riseth.

hour 7. and 33. min.
hour 7. and 43. min.
hour 7. and 53. min.
hour 8. and 3. min.
hour 8. and 9. min.

the morning, moist and unconstant.

Full moone the 18. day, 6. min. after 3. of the clock at
night, frosty and cold.

Last

A Prognostication.

Last quarter the 27. day 20. min. before one of the morning, fitting the season.

November Abstract.

November finish the phisick you meane to till March, except some great necessity doe come. Use good meate, and holosome wine to nourish thy blide thee warme cloathing and goe dry of thy selfe, sure to be troubled with Rheume and Rose, be other inconuenience that will ensue. Beware of house this moneth, and use Betony and Cynamon.

In the new of the Maone, you may remove you as in the last moneth, and set Crabtree stockes: when you please, it is good time in the wane of the set pease, and beanes, and if the weather be not good sowing of Parsnips, good making of makin of Beedes or swine.

Of December.

Day.	The sun riseth.	The sun setteth
1.	hour 8. and 12. min.	hour 3. and 4.
7.	hour 8. and 14. min.	hour 3. and 4.
14.	hour 8. and 15. min.	hour 3. and 4.
21.	hour 8. and 12. min.	hour 3. and 4.
28.	hour 8. and 7. min.	hour 3. and 4.

New Moone the 4. day 30. min. after 1. of the morning, winterly weather.

Last quarter the 26. day 22. min. after 5. of the night, cold and frosty.

Decembers Abstract.

In this moneth of December, keepe thy body and cold, and eate such meates as be of a hot quality from Phisick, & let thy Kitchen be thy Apothecary, cloathing thy nurse, merry company thy keeper and pitality thy exercitse.

Remove trees and bushes, if the weather perittane, in the wane of the moone, set beanes, those herbes that cannot endure the cold, rubb them from the frost and snow.

Soli Sapienti Deo Sola Gloria.
